About

I'm a first-year B.Tech student studying Artificial Intelligence & Machine Learning at USAR, GGSIPU, Delhi. I enjoy building for the web and exploring how software and AI can solve practical problems.

Education

B.Tech — Artificial Intelligence & Machine Learning

University School of Automation & Robotics
Guru Gobind Singh Indraprastha University, Delhi
first-year · Currently studying

Projects

TraceRisk · React, Express, AI, SQLite

Combines local news, travel advisories, weather, and route information in one workspace. Travelers can plan multi-stop trips, compare options, inspect original evidence, and share a trip briefing.

https://github.com/codeby-irFAN/TraceRisk
https://tracerisk.onrender.com/

Team Board · React, Supabase, PostgreSQL, Vite

A collaborative workspace built with React and Supabase. Tasks stay synchronized across clients without a refresh. Version checks, editing indicators, and locks help teams handle simultaneous changes.

https://github.com/codeby-irFAN/Team_Board
https://team-board-ashen.vercel.app

The languages

JavaScript · Python · C · HTML5 · CSS3

The toolkit

React · Git · GitHub · API integration

The next chapter — learning

Next.js · NumPy & pandas · scikit-learn · AI agents & RAG · Data structures

Learning with curiosity. Building with purpose.
