About

I'm a first-year B.Tech student studying Artificial Intelligence & Machine Learning at USAR, GGSIPU, Delhi. I enjoy building for the web and exploring how software and AI can solve practical problems.

Education

B.Tech — Artificial Intelligence & Machine Learning
University School of Automation & Robotics · GGSIPU, Delhi
First-year student

Projects

TraceRisk · React, Express, AI, SQLite

Combines local news, travel advisories, weather, and route information in one workspace. Travelers can plan multi-stop trips, compare options, inspect original evidence, and share a trip briefing.

github.com/codeby-irFAN/TraceRisk · Live project

Team Board · React, Supabase, PostgreSQL, Vite

A collaborative workspace built with React and Supabase. Tasks stay synchronized across clients without a refresh. Version checks, editing indicators, and locks help teams handle simultaneous changes.

github.com/codeby-irFAN/Team_Board · Live project

Technical Skills

JavaScript · Python · C · HTML5 · CSS3 · React · Git · GitHub · API integration

Currently Learning & Exploring

Next.js · NumPy & pandas · scikit-learn · AI agents & RAG · Data structures
